

The Tent

Aussie Swag Campers uses top quality, Australian made, *Dynaproofed* canvas which has been developed to handle diverse Australian conditions. The canvas is a water and mould proofed, heavy duty, cotton/polyester with a two year manufacturer's warranty. All models are fitted with a tropical roof (a second, replaceable roof) which forms a breeze way between the inner and outer roof layers to keep the camper cool and minimise condensation.

A large 7' x 17' (2.1m x 5.2m) annex roof zips on to cover the kitchen, and a second slightly smaller 4'7' x 17' (1.4m x 5.2m) awning zips on to the other side of the camper to provide excellent weather protection. The versatile smaller awning can also be zipped onto the kitchen side with an extension to cover the kitchen unit. This is ideal after a long day of driving when you want protection over the kitchen area that is quick and easy to set up. The smaller awning can stay zipped on when the camper is closed, so after opening it up, only two to four poles are needed to get full cover. You can be set up and relaxing in minutes. Pack up time is also quick, for an early getaway the next morning. The smaller awning can be left rolled up if it is not needed.

The large awning can also stay zipped on when the trailer is packed, if it is flipped over onto the main tent before closing up. Practicality is a priority in an Aussie Swag's design as there is no use in having all the bells and whistles if the camper is not quick to set up and easy to use.

A window flap over the draw bar zips to the main awning. This forms a shade cover for the fridge/storage box. There are two screened side door ways and three large windows around the bed area with inside flaps for privacy and weather control. The large windows and door ways allow the tent to be opened up for plenty of airflow in warmer conditions. All windows and doorways have solid canvas window flaps and doors which allow the camper to be fully closed in during cold, wet or windy conditions. All doors and window flaps have double slides with tried and tested YKK zips. The tent has a zippered screened back doorway to which a shower room can be attached.

◀ Rover LX comes standard with main awning, offside awning and tropical roof - stone guard flaps are optional

Excellent weather protection over windows

Side Bed Room - can sleep up to four ▼

Aussie Swag Campers has a number of annex pack options available. (Refer to the separate price list for details of the packs.) Screen walls with covers can be zipped to the awning roof to form a fully enclosed annex. The canvas covers can be removed or rolled up to form a fully screened annex. The covers can also be pegged out at an angle to allow air circulation.

The optional Kid's Room is one whole room, 4m long x 1.6m wide. The canvas roof, canvas walls and heavy duty vinyl floor are sewn into one piece. Access is through the second doorway of the main tent and an outside screened doorway (which is double zipped) located at the front end of the camper. In addition to the two screened doors, the Kid's Room also has three large windows with solid canvas flaps on the exterior of the tent.

The rear Kid's room, 2m long and 1.7m wide, is big enough for two bunk beds side by side but small enough to be left attached to the camper when closed. Less set up time means more holiday time! The rear flap also extends to provide a second tropical roof, minimising condensation and also cooling the inside. Three large windows close from the inside and allow plenty of air flow. The end window has an outside flap as well for weather protection and ventilation when conditions are wet and humid.

Aussie Swag Campers has two optional shower rooms. The rear shower room attaches by velcro to the rear entry of the camper. The rear canvas door flap of the main tent forms the roof, and the floor is made from annex matting and is sewn to the walls. The second optional shower room (standard on the Ultra) attaches to the front side of the camper and is used with the inbuilt hot water shower developed by Aussie Swag Campers or with a portable shower.

Annex Options

Full Annex (Annex Pack Two) with canvas covers rolled up and Rear Bed Room

Swing around kitchen frees up space in the annex

Aussie Swag Campers has developed an airflow roof vent in the centre of the inner roof to maximise air flow inside the camper in warmer weather. The air flow roof vent can be closed off in colder conditions or left open to minimise internal condensation.

Spacious and airy ensuite

Aussie Swag's Tropical Roof - the first on a hard floor camper and still the best designed

Optional Rear Bed Room with integrated tropical roof - Luxury camping for friends and family as well

Inside Rear Bedroom - plenty of ventilation ▼

A kitchen designed by cooks for cooks
