

AUSSIE SWAG CAMPERS

We were really happy with how the Aussie Swag handled whatever the rough central Australian tracks could throw at it (and there were some very rough ones – the Anne Beadell Highway from Coober Pedy to Laverton and the Talawana Track from east of Newman to Windy Corner for example). We lived in it for 8 weeks and did over 13,000 kms – it was so comfortable and easy to use. We just love it !!!

Ray Shorter

“Our first extended trip took us from Victoria to Broken Hill, Innamincka, Birdsville, Mount Isa, Darwin, Litchfield National Park, Alice Springs to Oodnadatta along the old Ghan railway line including Chambers Pillar and Dalhousie Springs, and the Flinders Ranges. Obviously some very testing conditions. Each time we used the camper we became increasingly impressed with the workmanship and attention to detail in the design and construction of the camper. Needless to say we are very happy with our purchase and extend our appreciation to yourselves and your staff for a job well done.”

Neville Britten

Our Customers Say ...

At the end of the day it was the Aussie Swag Camper that came out on top. Main reasons were its great build quality, more storage space, great looks and the fact that the factory is only 20 minutes from where we lived.

David and Melissa Grungle

We purchased our Aussie Swag Ultra campertrailer in 2005 after 3 years with the Heavyses soft floor camper. Our needs were changing and we wanted something that was quick to put up, external kitchen, separate kids room (the children don't always come with us), and off road. So far we are more than happy with it, and it is everything we hoped for.

Greg and Therese Elsey

I enclose some photographs of our trip across Australia east to west via the Gunbarrel Hwy. We were accompanied by John and Malvena Daunt with a similar rig to our own. Both trailers performed very well. By the time we had returned, having covered twelve and a half thousand kilometers, they had been subjected to every type of terrain and weather conditions. ... The double roof to the tent worked well and was particularly useful in regard to condensation when the cold got to below freezing which it did most nights. ... We did not have any leaks despite gales and torrential rain in some parts. ... We had a few adventures along the way as you might expect. It was so nice to quickly flip over the top and be set up in minutes when we were tired at the end of the day.
